 - Size range from 1” to 56”
 - Pressure Class range from #150 to API 10 000
 - Double Block & Bleed
 - Top Entry
 - Welded Body
 - Cryogenic & High Temperature
- **Rising Stem Ball Valves**
- **Gate Valves**
- **Check Valves**
- **Subsea Rotary Gate, Slab Gate & Expanding gate**
- **All Actuators Type**
- **H.P.U. (High Pressure Unit)**

WORLDWIDE PARTNERSHIPS

Our experience teaches us that having a trusted partner in strategic position of the world helps our service in time and performance.

At the moment we have selected workshops located respectively in South Korea (Dong Bu), Brasil (Asvotek), Australia (T.V.S.) UAE & (Fitech) that allow us to have a trusted and approved site for valves and actuator repair and testing.

A NEW WAY OF SERVICE

Always focused on customer needs with a look towards the future, Covatek's first goal is to integrate its offer with a new concept of service: the **Rental of Covatek's On-Site Machining & Testing equipment.**

This service permit to have available on site:

- Portable lathe machines with qualified technicians
- (on-site Flange Facing machining, pipe cutting)
- Portable **High Pressure Power Flexible Unit System**
- **Mobile Test-Bench** with Qualified Technicians
- Hydraulic bolting, Controlled bolting and tensioning, Bolt Torque
- **Portable flange** faces re-machining equipment
- **Portable lapping** machines
- Assembly & disassembly **training courses** for compact flanges, mc/joint

This idea will improve the result of performance allowing us to reduce time and costs related to logistics, repairing and testing.
